

Blade	Part Number	Length	Center Hole	Comment
Kubota Standard Blade	K5371-99040	20 9/16	7/8	
Original Kubota Hi-Lift Blade	K5371-34330	20 9/16	7/8	
New Kubota Hi-Lift Blade	K5371-34340	20 9/16	7/8	
Gator	91-438	20 9/16	1 1/8	Requires 1/8" bushing (can easily be cut from a cat 0 to cat 1 adapter)
Gator Fusion	491-438	20 9/16	1 1/8	Requires 1/8" bushing (can easily be cut from a cat 0 to cat 1 adapter)
Gator Mulcher	90-987	20 9/16	1 1/8	Requires 1/8" bushing (can easily be cut from a cat 0 to cat 1 adapter)
Gator Mulcher Fusion	490-987	20 9/16	1 1/8	Requires 1/8" bushing (can easily be cut from a cat 0 to cat 1 adapter)
Gator Mulcher 3-in-1 Magnum	96-787	20 9/16	1 1/8	Requires 1/8" bushing (can easily be cut from a cat 0 to cat 1 adapter)
Gator Mulcher 3-in-1 Magnum Fusion	496-787	20 9/16	1 1/8	Requires 1/8" bushing (can easily be cut from a cat 0 to cat 1 adapter)
Gator	92-115	20 9/16	29/32	Listed in Oregon Catalog as direct replacement for Kubota K5371-34340
Gator Mulcher 3-in-1	96-612	20 9/16	29/32	Listed in Oregon Catalog as direct replacement for Oregon 92-115

Gator Mulcher	The Gator Mulcher™ blades unique design has revolutionized the way blades mulch grass clippings. The angle of the Gator teeth redirects the air flow to keep the clipping directly in front of the cutting edge. The longer the clippings remain in front of the cutting edge, the finer the size of the clipping. The result - Less Bagging! Less Raking! Quicker Decomposition!
Gator Mulcher Hi-Lift	The 40% high lift version of the Gator Mulcher™ does an excellent job of standing the glass blade up straight for a cleaner cut. The HI-LIFT design also creates better air flow for less clumping and better bagging.
Gator Mulcher Magnum	Gator Mulcher Magnum™ blades feature the same tooth design as the standard Gator Mulcher™, but are 25% thicker and have a 40% higher lift. Greater durability and faster discharge of grass clippings make the Gator Mulcher Magnum™ ideal for the commercial cutter.
Gator Mulcher 3-in-1	Versatile blade for mulching, bagging or side discharge. Available in Standard, Mulcher, Hi-Lift and Magnum.
Fusion	The Fusion® process "fuses" tungsten carbide material into the blade, not onto the blade, for a superior edge. Fusion® blades stay sharper, and hold their clean cutting edge longer. R50™ hardness throughout the body of the blade. Sharpens as easily as a standard blade, just not as often. Fusion is available on select Standard, Mulcher, Hi-Lift and Magnum Gator Mulcher family blades.
