GLOW PLUG CATALOGUE 2018/2019

DENSO

THE BLUEPRINT FOR SUPERIOR GLOW PLUG TECHNOLOGY

**TERMINAL & SHELL**

The outer casing and terminal are zinc coated to resist corrosion.

INSULATOR

The Glow Plug insulating disc has exceptional strength, insulation and thermal conductivity to ensure that a short circuit cannot occur.

CASING

An alloy casing surrounds and protects the Glow Plug to provide heat resistance.

SEAL

A rubber seal is in place to prevent air from seeping through and corroding the coil.

INSULATION

Electrical insulation of the coil is provided by firmly packed magnesium oxide powder, which is also an efficient heat conductor.

REGULATING COIL

The main coil acts as a regulator within the Glow Plug to control and sustain temperature rise, and ensure a rapid warm-up.

COIL CONNECTION

Laser welding connects the Heating and Regulating coils to maintain their position at all times and ensure consistent resistance characteristics.

HEATING COIL

A shorter, tapered coil inside the end of the Glow Plug delivers a quick start (from as little as 3 seconds) even in cold conditions. It can then hold its post-heating temperature for up to six minutes after cold start. This contributes to lower engine emissions.

TIP

The narrowed plug tip ensures improved heating efficiency and excellent performance.

ABOUT THIS CATALOGUE

This catalogue has been issued by DENSO Automotive Systems Australia as a guide to assist the user in finding suitable DENSO glow plugs for Australian vehicle applications. DENSO does not warrant the accuracy of the contents and, to the extent allowable by Australian law, accepts no responsibility for any claims arising from the use of this catalogue.

- > The comparison tables in this catalogue do not guarantee the performance of these glow plugs when installed into the vehicles shown in the tables and are intended as reference only.
- > The glow plug specifications (construction, material, etc.) differ from one manufacturer to another.
- > Select a suitable type of glow plug from the application tables in this catalogue. If you are using a tuned or modified vehicle, the recommended glow plug may no longer be suitable, select an appropriate type of glow plug according to your own judgment and at your own responsibility.
- > The glow plugs listed in this catalogue cannot be used in an engine that is to be mounted in an aircraft or drone.
- > The contents of this catalogue are valid as of 1st July 2018. Subsequent to this date, the information may no longer match the actual product. Some parts of the previous catalogue have been updated. If you retain a copy of the previous catalogue, please discard it.
- > The appearance and specifications of the product are subject to change without prior notice.
- > Where possible, always physically compare the plug removed from the engine with the DENSO glow plug before installation.
If there is concern of difference between the two plugs do not install.

PRECAUTIONS WHEN PURCHASING & USING GLOW PLUGS

- > Be sure to turn off the engine before replacing or adjusting the plugs. Failure to heed this warning may result in a fire or an electric shock.
- > Do not drop a glow plug onto a hard floor. This may cause the glow plug to crack internally preventing it from functioning correctly.

1. ENLARGED PROBE TIP

CAUSE

- > Excessive voltage. (e.g. 12-V glow plug in a 24-V system or vice versa)
- > Failure of alternator and regulator.
- > Dampness during storage.

SOLUTION

- > Check on-board and glow plug voltage.
- > Check charging system.
- > Check quality or storage conditions.

2. BROKEN PROBE TIP

CAUSE

- > Excessive glowing / voltage. (e.g. 24-V glow plug in a 12-V system or vice versa)
- > Failure of alternator and regulator.

SOLUTION

- > Check contacts on glow plug regulator.
- > Check on-board and glow plug voltage.
- > Check charging system voltage.

3. DAMAGED OR MISSING PROBE TIP

CAUSE

- > Failure of ignition unit.
- > Direction or regularity of fuel jet incorrect.
- > Seating fault causing spraying position error.

SOLUTION

- > Check the ignition unit is correctly installed.
- > Check you are using the correct ignition unit for the vehicle model.
- > Check the glow plug installation point for carbon deposits.

4. DEFORMED PROBE (OVERHEATING)

CAUSE

- > Failure of ignition unit.
- > Direction or regularity of fuel jet incorrect.
- > Wrong spraying position caused by faulty sealing.
- > Excessive glowing / voltage. (e.g. 24-V glow plug in a 12-V system or vice versa)
- > Failure of alternator and regulator.
- > Function or timing fault in injection unit.

SOLUTION

- > Check the ignition unit is correctly installed.
- > Check you are using the correct ignition unit for the vehicle model.
- > Check the glow plug installation point for carbon deposits.
- > Check contacts on glow plug regulator.
- > Check on-board and glow plug voltage.
- > Check charging system voltage.
- > Check fuel injection timing.

5. MISSING PROBE

CAUSE

- > Ignition unit failure
- > Direction or regularity of fuel jet incorrect
- > Wrong spraying position caused by faulty sealing.
- > Function of timing fault in injection unit.
- > Thread damage to opening of cylinder head where glow plug is installed.
- > Glow plug insufficiently tightened causing plug to sit incorrectly.

SOLUTION

- > Check you are using the correct ignition unit for the vehicle model.
- > Check the ignition unit is correctly installed.
- > Check the glow plug installation point for carbon deposits.
- > Check timing of injection pump.
- > Check the opening of cylinder head for thread damage/carbon fouling.

6. SWOLLEN RING ON THE PROBE TIP

CAUSE

- > Oil in the combustion chamber, probably caused by engine wear.

SOLUTION

- > Check piston clearance in engine cylinders.
- > Check oil consumption.

7. PROBE TOUCHING BODY OF GLOW PLUG

CAUSE

- > Over-tightened torque.
- > Wrong tool used.
- > Thread damage to opening of cylinder head.

SOLUTION

- > Check the opening of cylinder head for thread damage/carbon fouling.
- > Check glow plug torque.

8. HOLES IN PROBE / CRACKS / MELTING NEXT TO BODY OF GLOW PLUG

CAUSE

- > Failure of ignition unit.
- > Direction or regularity of fuel jet incorrect.
- > Wrong spraying position caused by faulty sealing.
- > Function or timing fault in injection unit.
- > Thread damage to opening of cylinder head where glow plug is installed.
- > Glow plug insufficiently tightened causing plug to sit incorrectly.

SOLUTION

- > Check you are using the correct ignition unit for the vehicle model.
- > Check the ignition unit is correctly installed.
- > Check the glow plug installation point for carbon deposits.
- > Check the opening of cylinder head for thread damage/carbon fouling.
- > Check timing of injection pump.

9. CARBON DEPOSITS BETWEEN PROBE AND BODY OF GLOW PLUG

CAUSE

- > Failure of ignition unit.
- > Direction of regularity of fuel jet incorrect.
- > Wrong spraying position caused by faulty sealing.
- > Injection pump operation/timing failure.

SOLUTION

- > Check you are using the correct ignition unit for the vehicle model.
- > Check the ignition unit is correctly installed.
- > Check the glow plug installation point for carbon deposits.
- > Check the opening of cylinder head for thread damage / carbon fouling.
- > Check timing of injection pump.

10. BROKEN / BENT POWER TERMINAL

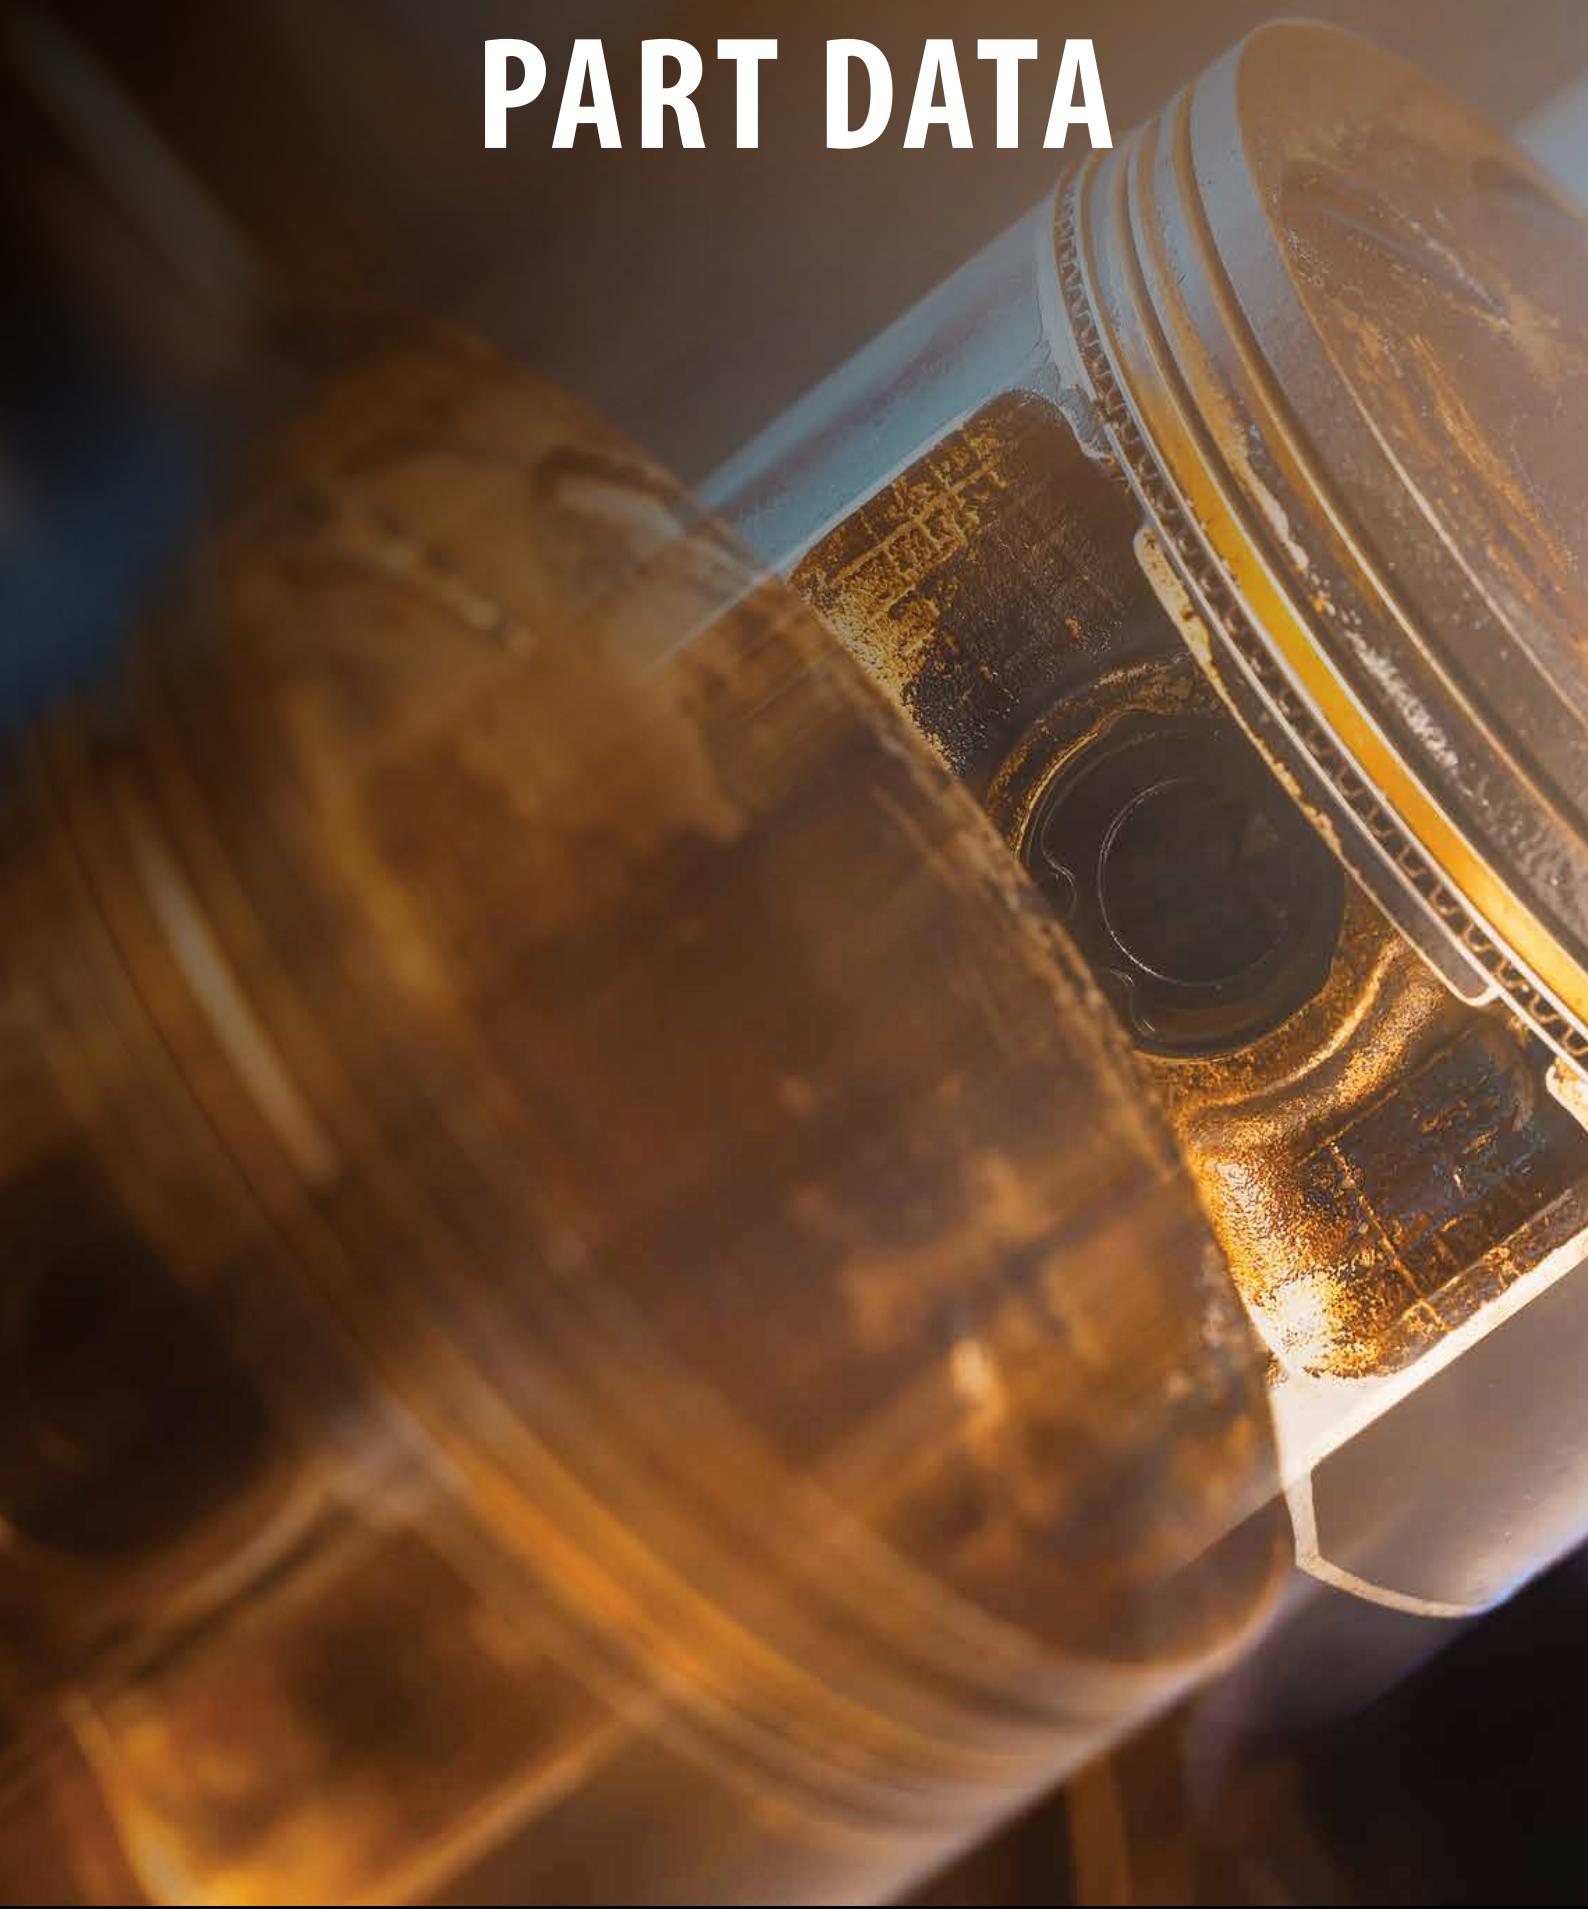

CAUSE

- > Over-tightened torque.
- > Wrong tool used.
- > Thread damage to opening of cylinder head.

SOLUTION

- > Check the opening of cylinder head for thread damage/carbon fouling.
- > Check glow plug torque.

RECOMMENDED TORQUE & ANGLE OF ROTATION FOR DENSO PLUGS:

It is necessary to install the plugs in the engine using the correct torque. If the torque is too low, the plugs are liable to work loose due to leakage of combustion gas or vibration, resulting in possible damage to the engine and the plugs. Conversely, if the torque is too high, the crimping between the insulator and the housing is liable to become loose, causing the integrity of the seal to be impaired or the mounting screw thread to break.

1. Use the correct wrench that matches the hex part of the plug. Take care not to damage the insulator.
2. When changing glow plugs, make sure that oil, dirt etc. on the outside of the disassembled glow plug does not enter into the cylinder.
3. When mounting the glow plug, clean the engine side of the flange and make sure the glow plug is correctly in-line with the thread of the cylinder head.
4. Make sure the plug is correctly positioned and tighten it by hand until it cannot be tightened any further.
5. Then, use a torque wrench to tighten it accurately to the torque showed in the chart below.

| RECOMMENDED INSTALLATION TORQUE SPECIFICATION | | CAUTION |
|---|--------------------|----------|
| THREAD SIZE | RECOMMENDED TORQUE | |
| GLOW PLUG | M8x1.00 | 8-10 Nm |
| | M9x1.00 | 8-10 Nm |
| | M10x1.00 | 10-12 Nm |
| | M10x1.25 | 10-12 Nm |
| | M12x1.25 | 15-20 Nm |
| | M14x1.25 | 20-25 Nm |
| | M18x1.50 | 30-40 Nm |
| TERMINAL | M4x0.7 | 1-1.5 Nm |
| | M5x0.8 | 3-4 Nm |

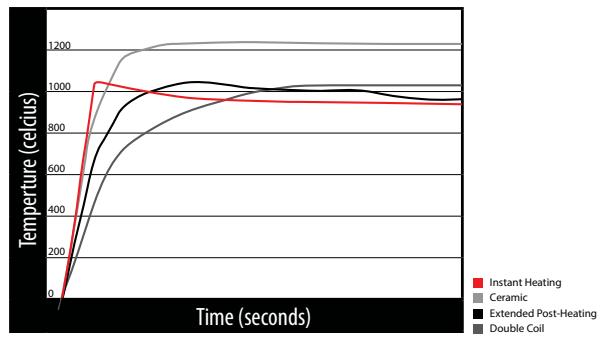

THE DENSO DIFFERENCE

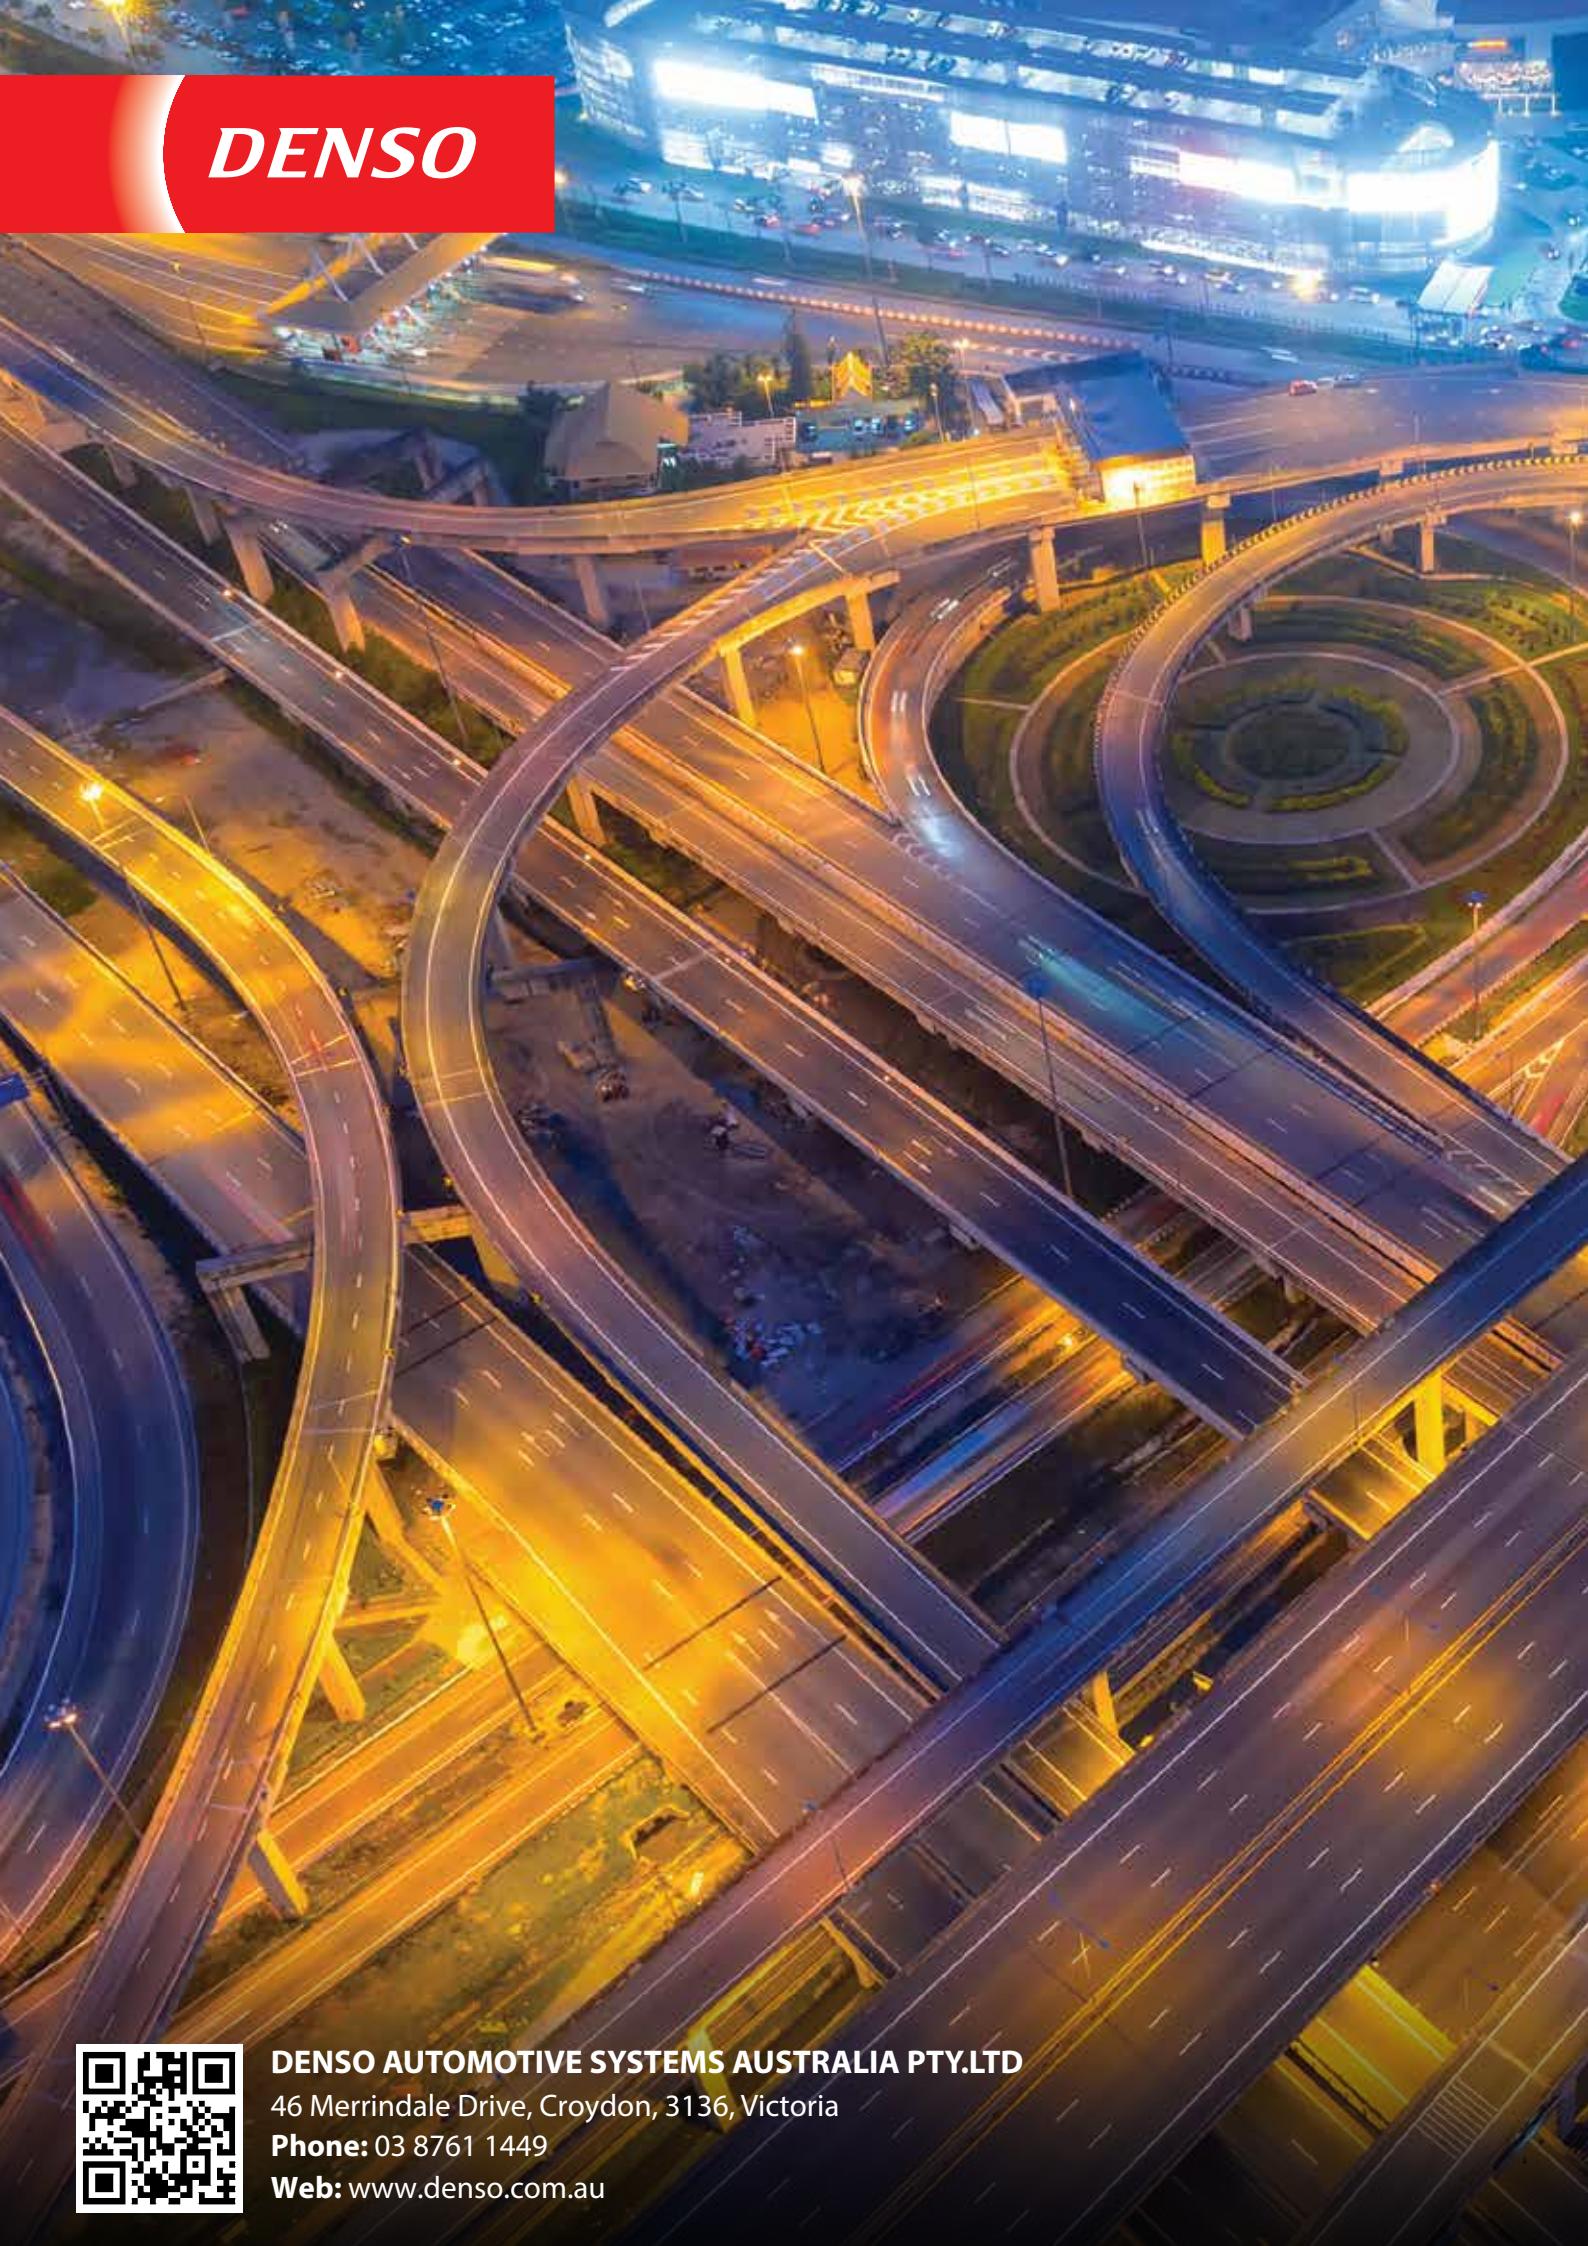

DENSO's Glow Plug programme is a major OE quality, all-makes introduction; launched to provide aftermarket customers with an alternative, advanced branded choice for their growing Diesel needs. The cutting edge programme benefits from DENSO Corporation's pedigree as a world leading OE manufacturer of glow plugs for leading automotive suppliers around the world. The DENSO Glow Plug programme encompasses all current glow plug technologies including single coil, double coil, extended postheating, ceramic glow plugs and instant heating.

FEATURES AND BENEFITS

- OE quality Glow Plugs** that meet or exceed manufacturers' specifications.
- Faster heat-up times** and a reliable cold-start.
- Extended post-heat temperatures** for lower emissions.
- Excellent coverage** ensures suitability for almost every diesel engine in Europe.
- More applications** covered with fewer part references.
- Easy** to use part numbering system.
- Meets** ISO TS16949, ISO14001 and OHSAS 18001 standards.

COMPARISON OF DENSO GLOW PLUG TYPES

The background of the advertisement is a high-angle, nighttime aerial photograph of a massive, multi-layered highway interchange. The roads are illuminated by streetlights and the headlights of moving vehicles, creating a vibrant glow against the dark sky. The interchange features several circular ramps and straightaways, all intricately connected. In the upper right corner, a large, modern building with many lit windows is visible, suggesting a nearby urban area.
