

Hydraulic INSTALLATION (smaller frame tractors)

1 Route kit supplied hoses under loader post

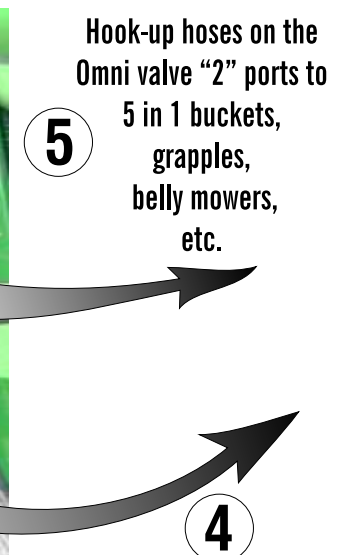

2 Hook-up the two supply hoses to "SCV" ports.

3 Hook-up hoses from Omni SCV ports to tractor's couplers with black and green plugs.

4 Hook-up hoses from the tractor loader bucket to the Omni's "1" ports.

5 Hook-up hoses on the Omni valve "2" ports to 5 in 1 buckets, grapples, belly mowers, etc.

OMNI Control

- **Circuit One is normally live**
- **Circuit Two is activated only when the control button is depressed. When the button is released, power automatically returns to circuit one.**
- **Hands-on convenience**
- **Mounts easily to control lever for fingertip control.**
- **Simple wiring harness including waterproof pushbutton & switch**

Slip Omni RCS grip over control lever and tighten using set screws in the adjustment bushing.

- **757-1550 1 Front Circuit/RCS***
- **757-1552 2 Circuit Front-Back/RCS***
- **357-010 Front to Rear kit ***
* Prefitted for Deere smaller HP tractors
