

## JOB APPLICATIONS

The GR30 and the GR30-HC series were designed for the Sub Compact and Compact tractor, but don't sell this sell this grapple short. This grapple has been used in such a wide variety of chores; gathering firewood, clearing, rock walls, feeding animals, burn piles, logs and much more.

**The only limitation is your imagination.**

## FEATURES

All tines are 3/8" AR400 for superior strength and amazing wear characteristics.

Back raking can be done with the grapple open and curled forward.

Don't under estimate the 2"x 6" cylinders, @ 3000 psi they produce a combined force of 18,850 lbs.

The 6" or 8" spacing, gives you the option to match your needs

The superior design had the smaller tractors in mind, by keeping the weight down and allowing more payload.

### **Comes complete with Mounts, Hoses, and Couplers**

GR30 has a 34" opening

GR30-HC has a 36" opening
