Kubota Diesel Engine

Kubota diesel engines are renowned for their durability and performance. That's what makes them No.1 diesel engine zero-turn mowers in America. The new ZD326H engine is no exception, with a larger displacement matched with powerful torque and horsepower to run the newly designed 72" mower deck.

New Power-efficient 72" Pro Commercial Mower Deck

Optimally engineered to reduce friction, the ZD326H boasts a new version of Kubota's popular 72" Pro Commercial mower deck that balances cutting performance and power savings. Fabricated with a 6" deep deck and advance baffle design, the welded mower deck efficiently provides a precision cut, while maintaining proper airflow for even clipping discharge.

Kubota HST Transmission

The ZD326H uses Kubota's heavy-duty integral twin hydrostatic transmission (HST) with a highly durable shaft drive and wet-type PTO clutch for reliable and smooth operation.
